When the customer use L-858D w/ RT-EL/PX or L-478DR-EL, there are some notes as follows.

Please note that this compatibility table is between Sekonic light meter and receivers of each radio system. Some functions available between each radio system may NOT work with Sekonic light meters due to technical limitations.

Item	Contents
Mode of transmitter on the camera	If using with Skyport HS, press the refresh button after you have made adjustments on the meter, and the new setting will be refrected on the Skyport HS LCD.
L-858D and L-478DR series specification	Even if the HSS mode is available on your flash units, L-858D or L-478DR series can not trigger HSS flash by radio.
