

C-4000 Utility Release Note

2026/6/15

Date	Version	Contents
-	1.00.00	Official Release
2026/6/15	1.01.00	Firmware Update improvements 1) Resolved an issue to ensure that C-4000 units can now successfully re-run the firmware update even if a prior update attempt had failed. 2) [Mac version only] Avoided Mac sleep issues during updates by shortening firmware download times and optimizing the keep-awake signaling. 3) [Windows version only] Fixed an issue where firmware updates could fail depends on the PC being used.

【To customer using C-4000 utility (V1.00.00)who experienced a firmware update failure.】
If the update button in the utility is disabled and you cannot update the utility itself, please uninstall C-4000 utility (V1.00.00), and then please download the C-4000 utility (V1.01.00), from our website and install it.
