

For customers using Data Transfer Software for Macintosh and  
DigitalMaster L-758 series

Thank you very much for using our products.

Under the environment of mac OS 11.1 Big Sur released in November 2020, we would like to inform you of the compatibility between Data Transfer Software and exposure meter.

As a result of verification, we confirmed that there were no problems with the basic operation, although there were some restrictions on the operation on the software.

**【Mac OS Big sur 11.1 operation results】**

Model	Data Transfer Software 6.10 Operation Results
DigitalMaster L-758 series	No problem with basic operation *
LiteMaster Pro L-478 series	No problem with basic operation
SpeedMaster L-858D series	No problem with basic operation

\*If you are using the DigitalMaster L-758 series, please install the latest USB driver.

**【Verification operating environment】**

Model	CPU	OS
Mac book air (2018)	Intel CoreI5	Big Sur11.1
Mac book air (2020)	apple M1	Big Sur11.1
Mac book Pro (2019)	Intel CoreI5	Big Sur11.1

**【For Customers using L-758 series】**

If you use Data Transfer Software, you need to update the USB driver.

Please uninstall the USB driver currently installed on your computer first. Then download it from the URL below.

<https://www.silabs.com/documents/public/software/Mac OSX VCP Driver.zip>

※For the detailed installation method, please refer to the [Data Transfer Software Guide](#) (p.34).

## [Restrictions]

- Jump to the [Exposure Profile] screen after opening and closing the pull-down on the [Custom Setting] or [User Setting] screen  
After selecting the setting item from the pull-down, we confirmed the phenomenon that the setting screen jumps to [Exposure Profile] screen when the pull-down is closed, but the change is reflected, so there is no problem in operation.

The procedure to reproduce the phenomenon is as follows

1. Select the [Custom Setting] or [User Setting] screen
2. Select the setting item from the pull-down and close the pull-down (it does not matter whether setting item is changed or not).
3. After 2., the screen jumps to the [Exposure Profile] screen on the Main screen.

Select the setting item from the pull-down

Open and close the pull-down

Jump to the [Exposure Profile] screen
