## SEKONIC Products in Short Supply

Currently, there is a shortage of electronic components worldwide, led by a lack of semiconductors.

This is due to several factors; the decrease in parts production because of Covid-19, power shortages, a shortage in raw materials, an increase in international logistics, a shortage of shipping containers, a reduction of flights, etc. Plus, there is a rapid increase in demand. The majority of reports say that there are no immediate signs of improvement at this time.

At Sekonic, we have been doing our best to secure parts. Currently, we are placing pre-orders for significant parts in sufficient quantities to meet the demand.

However, parts supply is still delayed, and parts suppliers respond to us with delivery dates of 6 months to 12 months.

Many of our products are currently unavailable in the market for these reasons.

For details on the delivery dates of our products, please kindly contact our authorized distributors in your respective country.

We will continue to make company-wide efforts to eliminate delivery delays.

We sincerely apologize for the inconvenience and thank you for your understanding during these difficult times.
